

MIDDLE SCHOOL MATH

Hello Parents and Students,

My name is Stephanie Caceres and I will be the middle school math teacher this year. I am excited to be starting at Hunting Park Christian Academy this fall and I'm hoping that everyone is having an enjoyable summer. I have over 15 years of experience as an educator in Christian schools and academies and I recognize the benefits of a Christian education. The Christian academy environment allows me to teach with a focus through the Lord.

I want to instill in your children the love for learning math and hope to strengthen their knowledge, while supporting and alleviating any fears about math. Math can be and will be fun this year!

I look forward to meeting my students and parents and answering any questions you may have regarding the daily instruction, homeworks, and tests and quizzes. Please have a restful summer and I will see you soon.

Sincerely,
Stephanie Caceres
