

Hello Parents and Students,

I'm hoping that everyone is having an enjoyable summer. My name is Stephanie Caceres and I will be returning for my second year as the Middle School Math Teacher at Hunting Park Christian Academy. I have over 15 years of experience as an educator in Christian schools and academies and I recognize the benefits of a Christian education. The Christian school environment allows me to instruct and guide students with a focus through the Lord.

I want to instill in your children the love for learning math and hope to strengthen their knowledge, while supporting and alleviating any fears about math. I hope that they will see that math is not only necessary, but can also be fun. In addition, we will be preparing for all standardized tests that the students will be taking throughout this year.

I look forward to meeting my new 6th grade students and parents and answering any questions you may have regarding the daily instruction, homeworks, and tests and quizzes. Please have a restful summer and I will see you soon.

Sincerely,  
Stephanie Caceres
